EXPERIENCE

Senior Software Engineer · Block / Square

Nov 2021 – Feb 2026

- Served as primary engineer for Payment Links, driving the product to 99.99% SLO — establishing it as the reliability standard for the team.
- Owned production reliability for Payment Links — resolving critical outages, mitigating DDoS SEVs, and proactively patching additional vulnerable services before they were exploited.
- Migrated ~23,000 merchants off a sunset platform as DRI, resolving a critical SLO degradation from 98.5% to 99.99% in the onboarding flow.
- Owned end-to-end delivery of Afterpay, Cash App Pay, Apple Pay, and Google Pay for Payment Links across multiple international markets, working cross-functionally across engineering, product, and partner teams through breaking API changes.
- Identified and eliminated redundant service calls across multiple services, achieving a 66% reduction in infrastructure load and 60ms latency savings per request.
- Designed, built, and maintained a proxy service bridging two separate infrastructures, providing authentication and routing between platforms — adopted by multiple teams to unblock key migration projects.

Software Engineer · Block / Square

May 2019 – November 2021

- Led international expansion of Payment Links to Japan, Canada, Australia, UK, and Ireland as sole engineer, independently managing eng design, stakeholder coordination, and production deployment to meet GTM deadlines.
- Led a multi-quarter seller onboarding initiative working cross-functionally across multiple teams — improving seller verification onboarding completion by 23% and overall signup rate by 24%.
- Identified and resolved a long-standing onboarding bug initially affecting ~1,500 sellers — directly restoring their ability to process payments and unblocking all future sellers from the same failure.
- Drove a UI redesign of the first-time experience using Square's Design System, resulting in a 3.8% increase in seller conversion rate.
- Led migration from a legacy internal platform to Square's public API, enabling third-party developer integrations and unlocking long-term platform extensibility.
- Instrumented observability across critical onboarding & payments flows, enabling proactive detection and faster resolution of production issues.

Web Developer & Teaching Assistant · Elevate Blue

June 2016 – June 2018

- Full-stack development across multiple production codebases at an early-stage startup; built and integrated RESTful APIs, third-party service integrations, and iOS/Android mobile experiences using React Native.
- Served as Teaching Assistant for an in-house coding bootcamp, mentoring students and junior developers through a full-stack web development curriculum.

TECHNICAL SKILLS

Languages Golang · PHP · JavaScript / TypeScript · Kotlin · Ruby

Frameworks React / React Native · Node.js · Laravel · Ruby on Rails · Vue · Ember

Databases PostgreSQL · MySQL

EDUCATION

B.S. Computer Science & Engineering

2013 – 2018

University of Nevada, Reno

Minors: Cybersecurity · Mathematics
